## Maverick Region Approved Technical Inspection Locations

Prior to participating in any DE event, you must have your car technically inspected within 30 days of the event. Generally, any authorized Porsche, or dealer in the make of your car can perform the technical inspection, as well as independent garages.

If the location you are interested in is not on the following list of Tech Inspection locations, call them first.

Regardless of which shop you use, please call and make an appointment ahead of time for your technical inspection and take a copy of the blank technical inspection form to the shop. There may be a charge for this service. Please ask the shop in advance.

Please contact [safety@mavpca.org](mailto:safety@mavpca.org) if you have any questions regarding your tech inspection or to inquire about additional location possibilities for those out of town.
